Isaac Heating & Air Conditioning Social Media Calendar: August, 2016

Date	Facebook Content	Twitter Content
8/1/16	<p>Think green! Isaac’s tankless water heaters eliminate more than 85% of flue gas wasted by standard water heaters and reduce carbon dioxide emissions by at least 420 lbs. per unit per year. Visit http://bit.ly/29BxxJO for more information.</p>	<p>Isaac’s tankless water heaters are a green and cost effective choice for your family. Visit http://bit.ly/29BxxJO for more information. #GreenLiving</p>
8/4/16	<p>Having sensitivities to the air within your own house? An air cleaner might be just what you need. http://bit.ly/29E9KvW</p>	<p>Allergens, dust, and bacteria? An air cleaner might be just what you need. http://bit.ly/29E9KvW</p>
8/6/16	<p>Heat and humidity can lead to a summer thunderstorm. Simple steps can prepare you in case you’re out of power for a long time.</p> <p>6 Key Ways To Be Ready for a Power Outage</p> <ol style="list-style-type: none"> 1. Have flashlights available and know where they are. If they can be easily found in the dark, you’ve placed them in good locations. 2. Make sure each flashlight has working batteries. Check and replace flashlight batteries when you change your smoke detector batteries at each time change. 3. Have a cooler or two ready. If it’s winter, you can take food from your refrigerator and freezer, put it in a cooler, and place it outside to keep it fresh longer. 4. Have a sump pump back-up system. Even if you don’t have a standby generator, there are water- and battery-powered back-up systems available for your sump pump. A must-have for finished basements. Isaac Plumbing Services can provide these systems. 5. Keep some canned goods and non-perishable food handy. In case of a longer-lasting outage, it’s a good safety measure to keep food on hand that won’t spoil as part of your emergency supplies. And remember: a hand can opener works anytime. 6. Know how to open your power garage door(s) manually. Garage doors that run on electricity can be opened manually, but it’s good to know how to release them prior to the outage. Remember, it’s going to be dark out there! 	<p>See the key ways to be ready for a summer power outage</p> <p>6 Key Ways To Be Ready for a Power Outage</p> <ol style="list-style-type: none"> 1.
